EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. Andrew N. Parfomak on July 1, 2009.

2. The application has been amended as follows:

2.1. Claims 1-3, 5-6, 9-15 have been cancelled without prejudice to their continued prosecution in a continuation application.

2.2. Claim 16 has been amended as follows:

--16. (Currently Amended) A process[, according to claim 15] for producing a detergent body having a solid component comprising at least 65 wt% of a builder selected from the group consisting of oligocarboxylate compounds, polycarboxylate compounds, phosphorus based builder, and mixtures thereof, comprising the following steps:

a) feeding component materials comprising the builder and optionally a binder for producing a composition to a barrel or hopper of an injection unit of an injection molding machine;

b) causing the component materials to be progressed along the barrel of the injection molding machine towards an injection nozzle;

c) injecting the component materials into a mold at a temperature above the plastification temperature of [a] the binder;

d) allowing the composition to chill in the mold; and

e) opening the mold and ejecting a shaped body therefrom.--

(support is found on page 5, lines 21-30; page 6, lines 1-2; page 11, lines 14-17; Table on page 15).

2.2. New claims 26-32 are added as follows:

--26. (New) A process according to claim 16, wherein the builder is an alkali metal citrate salt.

27. (New) A process according to claim 16, wherein step (a) comprises a binder.

28. (New) A process according to claim 27, wherein the binder comprises from 5 to 35 wt% of the detergent body.

29. (New) A process according to claim 27, wherein the binder comprises a thermoplastic material having a melting point of about 35°C.

30. (New) A process according to claim 27, wherein the binder is polyethylene glycol having a molecular mass of between 1,500 to 35,000.

31. (New) A process according to claim 16, wherein the process comprises adding a lubricant as a component material.

32. (New) A process according to claim 31, wherein the lubricant comprises from 0.1 to 10 wt%.--

(support for new claims 26-32 is found in original claims 10, 2, 3, 5, 6, 11 and 12, respectively).

2.3. The Abstract has been replaced with the following:

--A process for producing a shaped detergent body having a solid component comprising at least 65 wt% of builders, wherein the process comprises injection molding.--

STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The claims in their present amended forms have overcome Lundberg, Allan or Raehse, the close prior art of record because none of them teaches, discloses or suggests a process for producing a detergent body in the manner as those specifically recited, in particular, wherein the solid component comprises at least 65 wt% builders as those recited. Neither Lundberg nor Allan teaches the recited builders. Raehse teaches 10 to 60 wt% builders, which is outside the scope of the present claims. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the detergent art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lorna M. Douyon whose telephone number is 571-272-1313. The examiner can normally be reached on Mondays-Fridays 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
